Profile

Software Engineer with 1+ years of industry experience in data engineering, full-stack development, and AI/ML systems. Passionate about building scalable web applications, data pipelines, and LLM-powered solutions. Skilled in Python, JavaScript/TypeScript, and cloud technologies with a strong foundation in data structures and algorithms.

Education

B.Sc. in Software Engineering

Shahjalal University of Science and Technology, Sylhet.

Mar 2022 – May 2026

CGPA: 3.40/4.00

Professional Experience

Software Engineer Intern — Data Engineering

Pathao Ltd, Dhaka

Dec 2025 – May 2026

Data Engineering Team

Python · BeautifulSoup · Gemini API · Next.js · TypeScript · Tailwind CSS

- Scraped 60,000+ Bangladeshi village records; modelled Division→District→Upazila→Union→Village hierarchy.
- Built Next.js web app for village lookup by Union; deployed publicly as civic data resource.
- Built and maintained production ETL pipelines processing millions of daily ride-sharing and food-delivery events.
- Developed FastAPI endpoints for BI teams; optimised PostgreSQL queries for large-scale datasets.

Technical Skills

- Problem Solving:**
- Programming Languages:**
- Data & ML:**
- Frontend:**
- Backend & APIs:**
- Databases:**
- DevOps & Tools:**

Solved 900+ problems across LeetCode, Codeforces

Python JavaScript TypeScript Golang C/C++ Java

Pandas NumPy scikit-learn ChromaDB RAG LLMs Gemini API

React Next.js Tailwind CSS React Native

FastAPI Node.js Express.js

PostgreSQL MySQL MongoDB Supabase Firebase

Docker GitHub Actions CI/CD AWS Git Shell Scripting

Projects

• **KOTHA — AI Document Chatbot**

🐙 Repo

Aug – Sep 2025

• Python · FastAPI · ChromaDB · LLMs · Docker · PostgreSQL

• Built RAG pipeline (chunking → embeddings → ChromaDB vector search) enabling natural-language Q&A over uploaded PDFs/TXTs; containerised with Docker and deployed on AWS.

• Exposed via FastAPI REST API supporting multi-user concurrent sessions with document metadata managed in PostgreSQL.

• **ClipTalk — AI Entertainment Platform**

🌐 Live

🐙 Repo

Jun – Nov 2025

• React · TypeScript · Node.js · MongoDB · Docker · GitHub Actions

• Full-stack social platform with ML-based content recommendations, JWT auth, social features; CI/CD via Docker Compose & GitHub Actions.

• **PEARSON SPECTER LITT — Legal AI System**

🐙 Repo

Apr – May 2026

• Python · FastAPI · ChromaDB · Groq (LLaMA 3.3-70B) · Gemini Embeddings · SQLite

• Built RAG pipeline for legal documents: OCR ingestion → chunked embeddings → ChromaDB vector search + cross-encoder rerank → grounded case summaries with inline citations via FastAPI.

• Implemented operator edit loop that learns reusable style patterns from draft diffs and injects them into future prompts for continuous improvement.

• **SWAPNOTTHAN — Social Platform**

🌐 Live

🐙 Repo

Mar – Jun 2026

• Next.js · TypeScript · Express · MongoDB · PostgreSQL · NextAuth · Vercel

• Built full-stack social platform with Next.js frontend (auth, dashboard, pages) and separate Express + MongoDB backend API; deployed frontend on Vercel and backend on Railway with Google OAuth via NextAuth.

Problem Solving & Achievements

900+ competitive programming problems solved across LeetCode, Codeforces, and similar platforms. Strong proficiency in Data Structures & Algorithms.

🔗 Codeforces 🔗 LeetCode 🔗 CodeChef

• **6th Place & University Funded** — AIIM App, Innovation Hub, SUST

Jan 2025

• **Python Programming & Data Science** — ICT, SUST (EDGE Project)

Dec 2024

• **General Member** — SUST Software Engineering Society
